EXPLORATION AND DEVELOPMENT OF UNCONVENTIONAL HYDROCARBONS: UNDERSTANDING AND MITIGATING GEOTECHNICAL CHALLENGES THROUGH CONVENTIONAL WISDOM

CAPE TOWN, SOUTH AFRICA • 20-23 JUNE 2017

The objective of the workshop is to update the attendees on latest development and best practices on unconventional resource exploration and development. The workshop will review various approaches of what worked and what did not work in the field implementation of technologies. Also, the workshop will aim at identifying the knowledge and technology gaps that require further investigation and development. The workshop will attract experts from various disciplines to talk about their experience and share their knowledge and the learning curve from actual projects. Participants will be able to exchange views and ideas with the other professionals in the industry.

The majority of the presentations will be in the form of case studies, highlighting engineering achievements, and lessons learnt. In order to stimulate frank discussion, no proceedings are published and the press is not invited to attend. The workshop will be followed by a field visit to Karoo to understand depositional environment of White hill shale and Dwyka Fm, stratigraphy, and environmental issues.

Benefits of Attending

This workshop provides the opportunity to learn and discuss the latest knowledge, techniques & technologies applied to unconventional reservoirs which can be utilized to explore for and develop these reservoirs. The workshop will provide a set-up for networking, interacting & sharing expertise with fellow petroleum scientists interested in developing and producing unconventional hydrocarbon resources

Who Should Attend?

Geologists, Geophysicists, Reservoir Modelers, Sedimentologists, Petrophysicists, Reservoir Engineers, Team Leads and Managers.
