- 3.

Are you applying as an Associate VG?

An Associate VG is someone with less than 10 years' experience interested in engaging with the VGP in a junior-member capacity. Associate members are able to host talks and share innovations relating to emerging technologies and new geoscience workflows experienced by those recently entering the energy industry. They're also encouraged to visit universities and share ideas relevant to younger audiences such as fundamental geoscience skills, industry transitions, or workplace expectations.

- Yes No

Please return this form to a programs coordinator at vgp@aapg.org.
