

AAPG 2019 ICELAND GEOTOUR

We welcome you to join us for a once-in-a-lifetime adventure GeoTour to Iceland in the summer of 2019. Located near the top of the globe, Iceland is quite literally an amazing and otherworldly land of ice and fire that must be experienced to be believed. It's a vast geologic and panoramic wonderland where some of Earth's most pristine and exotic landscapes collide as a result of Earth's most powerful tectonic forces. An island that straddles two continents, rugged mountains, enormous glaciers, geothermal geysers and mudpots, volcanic edifices and lava fields that stretch beyond the horizon awaits. Iceland is not just a geologist's paradise, but it is also a cultural hotspot sporting a rich Nordic history and extraordinary people. From the Vikings and medieval sagas to contemporary artists and musicians, Iceland effuses the splendor of a long-storied civilization.

Our journey will take you to some of the most famous and beautiful attractions in Iceland, some of which serve as the actual filming locations in Game of Thrones. We will:

- Relax at the world famous Blue Lagoon Spa
- Travel the Golden Circle visiting awe-inspiring geothermal basins and beautiful waterfalls
- Explore the Icelandic National Museum and Sagas Museum
- Stroll through Reykjavik, the world's northernmost capital
- Drive across massive outwash plains
- Take a guided hiking tour on an actual glacier
- Visit the world famous Westmann Islands and catch a glimpse of Iceland's national birds
- Sink your toes into the black sand beaches of Vik
- Boat across a glacial lagoon, drifting between icebergs
- Gaze upon some of the most active volcanoes on Earth

**This trip is perfect
for anyone who
enjoys a blend of
culture, geology,
and amazing
landscapes**

**You don't need to
speak Icelandic,
be able to hike
mountains or have
a certain skillset
to participate**

**Accommodations
will be 3-4 star
hotels in cities
and villages
across southern
Iceland**

**Cost is only 5,500
USD per person
for this 6 day Tour**
