

INSTRUCTIONS TO BULLETIN AUTHORS

The AAPG Bulletin is designed for the dissemination of information on the geology and associated technology of petroleum, natural gas, and other energy mineral resources. The AAPG Editor makes the final decision concerning the acceptance or rejection of a paper. Manuscripts are reviewed by two or more referees for technical merit, quality of scientific content, and utility of the results for practicing geologists.

Format your manuscript using double-spaced lines and 12-point type, and organized as described under **Manuscript Preparation**. Manuscripts must be submitted online through the Aries Editorial Manager® system (www.editorialmanager.com/BLTN). The text must have line numbers. The figures and tables must be numbered. Questions about the submission process should be sent to bulletin@aapg.org.

SUBMISSION TYPES

Articles are papers of major extent and contain detailed geologic data that support original interpretations or methods. Submitted article length is not to exceed 50 pages, including double-spaced text, figures, and tables.

E&P Notes are short, timely, general interest papers focused on current exploration plays and practical field descriptions to improve recovery. Submitted article length should not exceed 20 pages, including figures and tables.

Geologic Notes are brief, timely, and of general interest. Geologic Notes are not to exceed 20 pages, including figures.

Geohorizons papers focus on current technical methodologies. Geohorizons papers should not exceed 20 pages including figures and tables.

Discussions and Replies pertain to articles published in the AAPG Bulletin. They are brief, to the point, and are not to exceed 6 pages including figures and tables.

Memorials are not to exceed 800 words. Longer text is subject to approval by the AAPG Editor. E-mail asharrer@aapg.org or phone (918) 560-2671 for more information.

MANUSCRIPT PREPARATION

Sections: Organize manuscripts as follows: • Title • Author(s) and address(es) • Acknowledgments • Abstract • Text • Appendix(es) • References Cited • Figure captions (separate sheet) • Figures and Tables (separate from text)

Manuscript Parameters

- Use metric units of measure with the English unit equivalent in parentheses or, conversely, English units with metric equivalents in parentheses. Laboratory measurements do not require conversions.
- Do not use abbreviations except for units of measure.
- Limit the use of acronyms. Please define all acronyms and nonstandard abbreviations used within figures and tables in each figure caption and table footnote.
- Cite figures in numerical order.
- Cite all references and include complete information for each citation in References Cited section.
- Limit the length of the abstract to no more than 250 words.
- Follow the North American Stratigraphic Code (see the AAPG Bulletin, v. 89, no. 11, p. 1547–1591, or online at <http://ngmdb.usgs.gov/Info/NACSN/Code2/code2.html>).

References Format

- Order references alphabetically. Order multiple listings by the same author(s) by date (earliest first).
- Single author journal article: Author's last name, initials, year, title of paper: full name of journal, v. x, p. xx–xx.
- Single author chapter or paper in a book: Author's last name, initials, year, chapter title, in editor's or compilers initials, last name, book title: city of publication, publisher, p. xx–xx.
- Single author book: Authors last name, initials, year, book title: city of publication, publisher, xxx p.
- Multiple authors: First author's last name, initials, initials and last name of second, third, etc. authors, year, etc.
- Maps: Author's or compilers last name, initials, year, map title: city of publication, map publisher, map scale, number of sheets.
- Computer programs on disk: Organization name, year, program name, version number: city of distributor, name of distributor.
- Internet: Author name(s), year of publication or last revision (if known), title of document, title or complete work (if applicable), URL, date of access.
- Work submitted or in preparation: Cite as personal communication.
- Please supply DOI numbers with all references when available.

PERMISSION/COPYRIGHT

The author must obtain permission to use previously published illustrations. Submit a letter of permission from the copyright holder with the manuscript before editing begins. A form to

request permission is available on the AAPG Publications Web site (<http://www.aapg.org/publications/copyright>).

ARTWORK PREPARATION

- For digital guidelines see “Electronic Submission Guidelines” (<http://www.aapg.org/publications/journals/bulletin/guidelines/electronic-submission>).
- Identify all figures by number.
- Oversized or color figures are published at the expense of authors; authors will be invoiced.
- Figures must include scales.
- Axes must be labeled on graphs.

Maps, Cross Sections, and Seismic Lines

Only countries that are recognized by the United Nations (see www.un.org/en/sections/about-un/overview/index.html) may appear on maps published in the Bulletin. Each map should contain a scale bar, north arrow, and a sufficient number (minimum of one set at or near each extremity) of coordinate (latitude, longitude) points to position, orient, and scale it, unless its sole purpose is to locate in general terms a larger scale map.

Each cross section and seismic line, as proprietary considerations allow, should be located on a map with the above basic information. If known, projection and geodetic datum information should be included. Satellite imagery, orthophotos, and similar metric photography should also be treated as maps. Authors are encouraged to submit, as supplementary documents, their maps originally prepared using the Geographic Information System (GIS) in a widely used geocoded file format (e.g., Arc Info, GEOTIFF).

AAPG Datashare

Authors of AAPG Bulletin articles or book chapters may share data files related to but not necessarily included in articles. Large data sets, spreadsheets, and oversized or animated images may be placed online on the Datashare page and can be accessed at <http://www.aapg.org/datashare/index.html>. The material will be referenced in the printed article and linked in the online version.

GALLEY PROOF

No content changes are allowed at galley proof stage.

PAGE CHARGES

For all papers accepted for publication in the 2017 calendar year, the journal shall assess AAPG member authors mandatory page charges of \$50 for the 10th and each subsequent typeset page. The mandatory charge for excess pages shall be \$75 per page for nonmember authors. Authors shall be asked to pay voluntary charges of \$25 per page for the first 9 pages.

The exact number of pages in an article cannot be confirmed until shortly before printing. However, a reasonable estimate is the number of double-spaced text pages (including references) divided by 3 plus the number of figures and tables multiplied by .6 $[(x/3)+(y+z)*0.6]$. Billing will take place after composition of the paper is complete. No charges are assessed if a submitted manuscript is not published.

In addition to these charges, there may be charges for changes requested in the typeset proofs that alter the text or figures in the accepted manuscript. The AAPG Publications Department staff will determine such charges from the proofs that reflect the changes.

It is AAPG's policy to suspend publication privileges of any author who has a past-due account with the association.

Hardship Relief

AAPG does not intend for page charges to prevent any author from publishing in the journal. AAPG expects that all authors with the personal, research-grant, or institutional resources to pay voluntary and mandatory page and color charges will do so. For more information on hardship relief and whether you qualify, visit the AAPG Publications website.

COVER PHOTOGRAPHS

The Bulletin considers good-quality digital images or 8 × 10 photographs, or digital images of geologic interest for the cover. Images should be approximately 300 ppi; the Bulletin cover is 8 inches by 10 ½ inches. Multiple submissions are welcome.

REPRINTS

In lieu of reprints, a PDF will be available to authors.
