

Uranium Committee Report

Michael D. Campbell, P.G., P.H., Chairman

November 1, 2005 Report

As of November, the Uranium Committee's 2005 Annual Report released in March continues to find readers throughout the U.S. and overseas. The Chairman's presentation at the Denver Conference also continues to receive a strong readership on the Internet. The citation for this presentation is listed below:

"Uranium Industry Re-Development and Expansion in the Early 21st Century: Supplying Fuel for the Expansion of Nuclear Power in the U.S., The Environment vs. The Paradigm,"

Presented at the Rocky Mountain Natural Gas Strategy Conference & Investment Forum, Session 1: Energy Supply - Quantities and Qualities, Organized by the Colorado Oil & Gas Association, August 1, 2005, Denver, Colorado, 44 p. ([Conference Program](#)) ([PowerPoint Version](#)) ([PDF Version](#)) Released August 1, 2005.

I have added a new AAPG member to the Uranium Committee:

Mr. Bruce Handley, P.G., Houston, Texas

He is working diligently on gathering news items and watching trends as input for the Uranium Committee's 2006 Report. The drafting of this report will begin in early January, 2006 with a target release date of March, 2006.

With the support and encouragement of Brian Cardot, and the Committee's Special Consultants, the Uranium Committee members continue to gather new information for the Members Page. A major update is scheduled for the end of November, workload permitting. The Committee continues in its mission to provide information on monitoring uranium activity in terms of industry news as well as on meetings, symposia, and training, and in continuing to build the References section on the Web site for use by EMD members and, thereby, to encourage new membership.
