

Permian Spacing Dynamics: Opportunities and Risks

Bernadette Johnson Enverus DrillingInfo

With the ongoing focus on generating sustainable free cash flow, spacing remains a key piece of the asset development planning puzzle. Spacing represents both risk and opportunity, and this presentation will offer a deep dive look into current spacing trends in the Permian. What is going well? How does optimal spacing vary across the basin? What does the upheaval in 2020 and dramatic reduction in drilling activity mean for spacing decisions?
