LOW RESISTIVITY RESERVOIRS: PATH TO EXPLORE, DISCOVER AND DEVELOP

WHAT TO EXPECT FROM THE AAPG EXPERIENCE

The American Association of Petroleum Geologists (AAPG) and our suppliers, venues and services partners are committed to providing a clean and safe environment and experience for all our event participants. We remain alert to COVID-19 risks and are closely following and adapting to all applicable health and safety guidelines. While conditions vary between countries, cities, municipalities, and facilities, safeguarding measures you may encounter at AAPG events include physical distancing and masking, readily available hand sanitizer, enhanced cleaning and disinfecting protocols, temperature health checks and screenings, minimized touchpoints and cashless payment options.

As personal safety is a shared responsibility, we ask that all participants ensure that they are feeling well and in good health, with no fever or other symptoms related to COVID-19, before showing up at an AAPG event. Any specific delegate obligations will be published in pre-event communications and clearly displayed on signage throughout our venues. Given the ever-changing nature of the pandemic recovery, registrants will receive regular updates and instructions concerning the latest health and safety requirements.

Please note that AAPG will be regularly monitoring and updating information concerning travel and entry requirements to the workshop.

WORKSHOP OUTLINE

Workshop Overview

“Wait! There is a short cut. Turn right from here”. That’s probably the sound of an electric current bypassing the resistive hydrocarbons, in a maze or network of porous media, when traveling from transmitter to receiver. Short cuts don’t always serve our needs, as it can mask humongous reserves and development opportunities from us. We call that phenomenon as low resistivity pay. However, on the other hand, resistivity-related missed opportunities can happen with low contrast, where resistivity has no short cuts under different circumstances.

In the past century, the world has witnessed a successful long streak of large field discoveries and structures. Along with that, challenges in identifying and evaluating the low resistivity and low resistivity contrast pays with the conventional log analysis has risen to surface. In this workshop, we come together for a common target towards building and strengthening our knowledge in identifying, characterizing and modeling low contrast and low resistivity pays. Ultimately, we aim to gear ourselves with state of the art and unconventional skills to look at our existing and new reservoirs with different binoculars to hopefully unlock new hydrocarbon reservoir potentials and achieve another streak of discoveries.

We strive to have as much as possible from both industry and educational institutions to come together and share our years of experience in a such collaborative and knowledge exchange session to tap on low resistivity and low contrast issues from different and multi-disciplinary angles. With that, this workshop will serve the participants need with the up to date advancements in describing and characterizing low resistivity and low contrast pay, and eventually, maximize resources.

Benefits of Attending

The workshop is an opportunity for attendees to receive up-to-date knowledge on the different approaches for evaluating the complex low-resistivity and low-resistivity-contrast payformation from the exposure to regional and global casestudies and the state-of-the-art technologies being employed as part of the evaluation. The forum will facilitate to make a network with subject matter experts, across the globe.

Who Should Attend?

This workshop targets petrophysicists and geologists, from E & P companies and service providers, as well as academic institutions, dealing with formation evaluation of clastics and carbonate associated with low-resistivity and low-resistivity-contrast pay formations.

WORKSHOP GUIDELINES

FORMAT

The workshop will be 3 days, consisting of oral presentations, poster presentations and breakout sessions where participants can discuss and investigate a specific theme that is of mutual interest. The first day will feature an inaugural keynote speech by a high-profile professional from the industry.

ATTENDANCE

Registrations are invited from all relevant disciplines with experience and/or knowledge of the subject areas being addressed in the workshop. Registrations will be accepted on a first-come, first-served basis.

CALL FOR POSTERS

You are invited to prepare a poster for presentation at the workshop. If you are interested in participating, please send a short abstract to cnavarro@aapg.org by 6 April 2023. All posters will be produced as pull-up banners and delivered by AAPG. There will not be any other format available for poster display.

REGISTRATION TYPES & FEES

Fees are inclusive of onsite documentation, coffee breaks and luncheons.

- \$1,850 AAPG Non-Member Fee
- \$1,850 Join and Save
- \$1,650 AAPG Member Fee
- \$1,550 Committee/Presenter
- \$850 AAPG Young Professional Non-Member Fee
- \$750 AAPG Young Professional Member Fee
- \$500 Academia Fee
- \$350 AAPG Student Non-Member (Masters)
- \$250 AAPG Student Member (Masters)

*To avail a Member rate you must be an active member of AAPG.

**To register as a Young Professional you must be under the age of 35 with less than 10 years of work experience.

REGISTRATION DEADLINE

To guarantee your seat, please make sure to register by 1 May 2023.

CANCELLATION POLICY

AAPG will refund the tuition, less a \$100 processing fee, if the request is received no later than 30 days prior to the workshop. Cancellations must be made in writing. The registrar will accept cancellation notices by telephone, but all such notices must be followed up by fax or e-mail. No refund will be made for cancellations received less than 30 days prior to a workshop being given. Nonpayment of tuition does not constitute automatic cancellation. If no cancellation notice is received by 30 days prior to a workshop, participants are liable for full tuition. AAPG reserves the right to cancel a workshop if enrollment is insufficient to ensure proper effectiveness. Substitutions for individuals can be made at any time. A paid enrollment may be transferred one time to a future workshop if the request is received prior to the 30-day cut-off date.
